

VERITAS®

SCHMETZ INSIDE

VERITAS Rachel - Everything on Board

The 32 stitch programs help to create an individual unique piece from each sewing project.

This also includes the 1-step automatic buttonhole mechanism, the integrated thread trimmer and the glare-free LED sewing light. The decorative stitches, elastic stitches and overlock stitches can be individually adjusted in stitch width and length.

Strength can be so gentle

When you're working with heavy fabrics like cord or denim, you need a sewing machine that can take the strain. The powerful motor in the VERITAS Rachel runs so quietly and with such low vibration, that you'll both stay cool and relaxed even after hours of sewing. The machine is also very gentle on delicate materials such as satin and chiffon. Every stitch programme can be further modified in stitch length and width to guarantee optimal suitability for different materials and can be carried out quickly and easily with two setting buttons. A maximum of 5 mm in length and width offer flexibility to implement your own ideas to perfection.

We've got everything covered

Sewing with stretchy materials like jersey can present a particular challenge; on the one hand the material is very delicate and ladders can form, so professionals always recommend using a stretch needle with a rounded head. It is also important to pay particular attention to certain points, because the seam should be both durable and as elastic as the fabric itself. VERITAS Rachel has the perfect solution: the overlock stitch, which is ideally suited for elastic materials and which also keeps the seams tight on extremely stretchy jeans. The overlock stitch also neatens the seam, as it sews over the edge thus preventing the material from fraying, and ensures a good edge guide. And in a single action!

Buttonhole made easy

Thanks to the 1-step automatic buttonhole mechanism, which creates professional looking buttonholes in one go, you save a lot of time. This allows you to think about new looks in peace and quiet and to come up with unusual ideas.

Specifications

32 stitch programmes, including overlocking and decorative stitches

1-step automatic buttonhole function

Speed (R.P.M.): 750 +/-50

High torque for stiff materials

Sewing zippers possible

Integrated threader

Built-in thread cutter

Stitch length from 1.0 to 5.0 mm

Stitch width from 0.0 to 5.0 mm

Automatic bobbin winder

Handy free arm

Integrated detachable accessory box

Rachel

The mother of the environmental movement

There is hardly a book written in the 20th century that has changed our view of the world to such an extent as "The Silent Spring" by Rachel Carson, which triggered an almost worldwide ban on the insecticide DDT and launched the environmental movement. Published in 1962, the book now marks the turning point of the relationship between man and nature, and today we humans no longer see ourselves as the rulers and masters of nature, but as the conservers and protectors of our natural environment. This fundamental change in our thinking would have happened much later without Rachel Carson.
