

PE#DESIGN11 PE#DESIGN PLUS2

PERSONAL EMBROIDERY DESIGN SOFTWARE SYSTEM

PE-Design Software

- Wide Variety of Digitizing Functions
- Photo Stitch
- Easy User Interface
- USB-sized Security Dongle
- Compatibility with Scan Cut:

PE-Design 11 – the versatile all-in-one embroidery and sewing digitizing software

Packed with powerful and timesaving features, this software is for both the casual hobbyist and the home-based business. Imagine the capability to create your own fonts, stitches and designs – just once – to use many times on hats, pillows, shirts, and other fabrics.

Reduce the amount of time spent changing threads by using the Intelligent Colour Sort feature, which will stitch those areas that share one colour in groups. Best yet – if you own the Luminaire Innov-ís XP1, enjoy wireless LAN connectivity to wirelessly transfer your embroidery designs and sewing stitches.

Advanced Layout and Editing Features

- 130 fonts with font filter: Filter by type of font to narrow down font choices
- Convert thread palette of existing design to colour palette of choice
- Over 1,000 built-in designs: See a preview of the design before you stitch
- Font mapping: Map your favorite fonts to use as easily as built-in lettering
- Stitch Design Factory: Create and save your own decorative sewing stitches, up to 100 mm wide*
- Updated thread chart: Choose from additional thread colours from existing brands, or choose from two new brands of threads

Decorative Fill Pattern

Echo Quilting

More Powerful Quilting Functions

- Automatically remove background from embroidery designs and quilt with echo fill, decorative fills, stippling, and cross-hatch quilting stitches
- Decorative fill patterns: Create your own with programmable stitch creator, or choose from the 54 built-in decorative fill patterns to use as standard or background fill stitches
- Echo quilting: Fill your block with a radiating quilting method to follow the curve of your motif
- Fill pattern editing: Additional fill patterns are included, with more flexibility to customize decorative fills such as a random shift function that distorts the original pattern for unique fills

Already own PE-Design 10?

Upgrade your existing software to receive enhanced capabilities and added features! Ask your dealer about the PE-Design 11 Upgrade.

Special features for the Luminaire XP1

Wireless LAN Connectivity:

- Wirelessly transfer embroidery designs and sewing stitches between PE-Design 11 and the Luminaire XP1
- Enhanced large split pattern functionality using the Snowman Positioning Marker:
- Create large split designs using the large 272 x 408 mm (10 5/8" x 16") hoop of the Luminaire XP1

Enhanced Image Tracing for Photostitch & Auto Punch

PhotoStitch, auto punch and cross stitch wizards for enhanced image tracing for more accurate image tracing output.

J

Compatibility with Scan Cut

Compatible with ScanNCut:

- Import FCM files to create embroidery designs
- Create FCM files to send to CanvasWorkspace or directly to a wirelesslyenabled ScanNCut machine

Ultimate Customisation and Design Tools

- Intelligent Colour Sort helps reduce the amount of time you spend manually matching color segments and the time at your machine to change threads
- The fabric selector automatically adjusts the sewing attributes for your embroidery based on your fabric selection

0

• Round and flexible spiral stitches add motion and dimension to your embroidery shapes, and stitches can be set to follow the shape of your embroidery or stand out to give you a 3-dimensional effect

Flexible Spiral Stitch and Stitch Direction

Scan

Experience Basic Features of Embroidery Data Editing with our

PE-Design Plus 2

- Photo Stitch
- Basic Digitizing functions
- Applique Wizard
- Compatibility with Scan Cut
 Convert to cutting data

To compare the differences between PE-Design 11 and PE-Design Plus 2, see the chart on the next page.

Enjoy the New and Enhanced Features of PE-Design
